## Educational Objectives

Upon completion, attendees should be able to:

- ◆ Clues to successfully passing the MR Registry and MRSO course
- ◆ Identify and review MSK anatomy and pathology
- ◆ Understand Standardization, Certification and Credentialing in MR, Joint Commission
- ◆ Describe recent advances in MRI Protocols
- ◆ Review safety protocols to protect patients from burns
- ◆ Learn About Artificial Intelligence and our role
- ◆ Identify Non Traditional Imaging and processes
- ◆ Understand MR safety, including MR safety for 3T and ferromagnetic detection systems
- ◆ Be Motivated in the workplace
- ◆ Understand Productivity Limits with MR Safety
- ◆ Establish new contacts with MR experts.
- ◆ Review MRI Contrast Agents and up to date reports
- ◆ Describe advances in pathology identification

**Overview:** Here we go again! We are excited for another two day interactive conference to review and explore, essential methods for MR professionals. Our continued focus for this annual MRI seminar is to learn and apply MR concepts in a non-intimidating setup. We have added our MR Registry Prep Course for the newcomers to the MR world. We have invited internationally known experts such as *Dr. Frank Shellock, Bill Faulkner, Charles Stanley, Dr. Joseph Yu, Tobias Gilk, and Mark Smith* to share their expertise during this event. In addition to the lecture style sessions, there will always be time for questions, vendor product display booths and MR posters. Whether you are a technologist, student, physician, nurse or healthcare manager involved with MR, you will find the latest MR imaging and patient care methods to enhance your skills in an ever-changing environment.
